

Q&A

HealthProtect™ & SARS-CoV-2

1. Do Blueair air purifiers remove SARS-CoV-2 from the air?

- Committed to third-party testing that produce honest and factual results, Blueair has tested its HealthProtect™ 7400 series air purifier against the live SARS-CoV-2 virus in a biosafety level 3 laboratory.
- Testing proves that our new product HealthProtect™ 7400 series removes 99.99% of airborne SARS-CoV-2 in a 13ft3 (0.37m3) chamber.* (Only the HealthProtect™ 7400 series has been tested).

**Blueair HealthProtect™ air purifiers has not been proven to kill SARS-CoV-2 or reduce or prevent the transmission of the virus.*

2. Does HealthProtect™ air purifier kill SARS-CoV-2 on the filter?

- No. Given the novel nature of this virus Blueair has not completed tests that demonstrates our ability to kill SARS-CoV-2 so we do not make this claim.
- Testing proves that our new product HealthProtect™ 7400 series removes 99.99% of airborne SARS-CoV-2 in a 13ft3 (0.37m3) chamber. (Only the HealthProtect™ 7400 series has been tested).

3. Has HealthProtect™'s GermShield™ technology been tested to kill SARS-CoV-2?

- No. The GermShield™ technology used in the Blueair HealthProtect™ air purifiers has not been subjected to a test to kill SARS-CoV-2 or reduce or prevent the transmission of the virus. Given the novel nature of this virus Blueair has not conducted tests that demonstrates our ability to kill SARS-CoV-2 so we do not make this claim.
- The GermShield™ technology used in the HealthProtect™ models is specifically developed to stop germ growth and kill germs 24/7 as the technology can be used also when the air purifier is in standby mode (Tested on Staphylococcus albus and MS2 bacteriophage (deactivation) and E.coli (growth prevention)).

4. How should I handle the SmartFilter™ if I am worried about SARS-CoV-2?

- Even when your air purifier is on standby, the GermShield™ technology proactively monitors your room and activates to kill germs* and prevent germ growth on the filter. For extra precautions, you can wear a protective glove while handling the filter or wash your hands after filter handling.

**Tested on Staphylococcus albus and MS2 bacteriophage (deactivation) and E.coli (growth prevention). Blueair air purifiers have not been proven to kill SARS-CoV-2.*

5. What sets HealthProtect™ apart from our other Blueair air purifiers in terms of SARS-CoV-2 removal performance?

- Our new HealthProtect™ 7400 series air purifier is the only Blueair air purifier as of now, which has been tested and proven to remove 99.99% of airborne SARS-CoV-2 in a 13ft3 (0.37m3) chamber*.

**Blueair HealthProtect™ air purifiers has not been proven to kill SARS-CoV-2 or reduce or prevent the transmission of the virus.*

6. If I have a HealthProtect™ air purifier in my home, am I safe to have visitors over without masks?

- Blueair recommends to follow the national and international guidelines on protecting yourself from the SARS-CoV-2.

7. How fast will HealthProtect™ air purifier remove SARS-CoV-2 from my room?

- Our current testing focuses on measuring the airborne SARS-CoV-2 removal in a 13ft3 (0.37m3) test chamber. We have not tested for airborne SARS-CoV-2 removal in a larger room size due to safety restrictions specific to the novel nature of SARS-CoV-2.
